Claim Objections

Claim 2 is objected to because of the following informalities: on line 5, "may be" should be changed to --is-- in order to particularly point out and distinctly claim the subject matter.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 9, 10, and 21 are rejected under 35 U.S.C. 102(b) as being anticipated by Lesea (US 6,246,258 B1).

Regarding claim 1, Lesea discloses, in Fig. 3, an integrated circuit to interface to memory (144), the integrated circuit comprising:

a first off chip driver calibration terminal (130) to couple to an external pull-up resistor (R above 126);

a second off chip driver calibration terminal (133) to a first switch couple to an external pull-down resistor (R below 129);

a first switch (135) coupled between the first off chip driver calibration terminal and a voltage reference node (VREF); and

a second switch (138) coupled between the second off chip driver calibration terminal and the voltage reference node.

Art Unit: 2819

Regarding claim 9, Lesea discloses, in Fig. 3, that the integrated circuit is a memory controller (119).

Regarding claim 10, as for the "processor", it has been held that a recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus satisfying the claimed structural limitations. Ex parte Masham, 2 USPQ2d 1647 (1987).

Claim 21 is rejected similarly with claims 1 and 9-10 as discussed above.

Allowable Subject Matter

Claims 11-20 and 24-33 are allowed.

Claims 2-8 and 22-23 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
